

Master Checklist

Tick each item as you go. Nothing needs to happen in one sitting.

BEFORE YOU TOUCH THE LAPTOP

- ☐ Filled out the readiness worksheet
- ☐ Backed up anything important, and confirmed it
- ☐ Wrote down the Wi-Fi password
- ☐ Have a USB stick, 8 GB+, to erase
- ☐ Laptop plugged into power

INSTALL LINUX

- ☐ Downloaded Linux Mint from the official site
- ☐ Made a bootable USB stick (balenaEtcher)
- ☐ Booted the laptop from the USB stick
- ☐ Chose "erase and install" deliberately (or dual-boot)
- ☐ Restarts into Linux Mint on its own

FIRST BOOT

- ☐ Connected to Wi-Fi or ethernet
- ☐ Installed all updates, restarted
- ☐ Set the screen to lock automatically
- ☐ Opened a terminal

DEVELOPMENT TOOLS

- ☐ Git installed
- ☐ VS Code installed

- ☐ Python installed
- ☐ Node.js and npm installed
- ☐ GitHub CLI (gh) installed
- ☐ verify-setup.sh shows everything present

GIT AND GITHUB

- ☐ Created a free GitHub account
- ☐ Set my name and email in Git
- ☐ Signed in with gh auth login

FIRST PROJECT

- ☐ Made a project folder, opened it in VS Code
- ☐ Built the Build Log
- ☐ Ran it locally in a browser
- ☐ Made a visible change
- ☐ git init, first commit
- ☐ Created the GitHub repo and pushed

DEPLOYMENT

- ☐ Turned on GitHub Pages
- ☐ Visited the live URL — it works
- ☐ Changed it, pushed, saw it update live

AFTER THAT

- ☐ Know where the code, folder, and URL are
- ☐ Decided what to build next
